## **Cessna Cardinal Seat Rails Now Available from McFarlane**

Baldwin City, Kansas, October 24, 2007 - McFarlane Aviation Products, a leading FAA-PMA parts manufacturer and distributor, announced that they now have FAA-PMA approved seat rails for the Cessna 177 Cardinal aircraft approved, in-stock, and ready to ship. The product line includes twelve part numbers and completes McFarlane's line of seat rails for the Cessna single engine aircraft.

The new McFarlane Cardinal rails are the best replacement seat rails available because they are made with the same high quality material and improved design as the other McFarlane seat rails. There is more metal where it is needed for better crack resistance and longer service life. The rails are also anodized instead of alodined for better wear resistance and corrosion protection.

All FAA-PMA seat rails from McFarlane come with complete documentation. A FAA 8130-3 Airworthiness Approval Tag and a traceable lot number are supplied with every rail. Verification of authenticity or production history of any McFarlane replacement part may be verified free of charge at any time by simply supplying McFarlane with the lot number that is marked on the part or the 8130-3 tag.

McFarlane Aviation Products has provided general aviation with high quality replacement aircraft parts at an affordable price for over 20 years. McFarlane Cardinal rails continue this tradition by providing an improved seat rail at a money saving price.
