

## **Beechcraft Flight Control Cables and Chains Now Available from McFarlane**

Baldwin City, Kansas, December 17, 2008 - McFarlane Aviation Products, a leading FAA-PMA parts manufacturer and distributor, announced that they now have FAA-PMA approved flight control cables and chains for most Beechcraft aircraft approved and ready for quick delivery. The product line includes 180 part numbers for the Musketeer, Sport, Sierra, Bonanza, Debonair, Baron, King Air, Queen Air, Duke, Duchess, T-34 and even the Model 1900 Airliner.

In addition to the cables and chains McFarlane announced the MC6057 FAA-PMA cable stop to replace the Beechcraft part numbers 35-524288 and 35-524287. The MC6057 was improved for more consistent holding strength. This cable stop is included on many of the McFarlane trim cables, but is also available separately for use on the assist step cable on the Beechcraft 35, A35 and C35 Bonanzas.

All McFarlane flight control cables and chains are built to the highest quality standards. Each cable is proof loaded and pre-stretched to ensure the integrity of every cable and prevent growth and rigging changes after installation. McFarlane uses only the highest quality cable and terminals from trusted U.S. suppliers certified by the federal government. To further ensure quality, all materials are thoroughly inspected upon receipt and one cable assembly from every production lot is subjected to a test load of 100% of its rated minimum breaking strength and then destroyed. Each cable is also dipped in a MIL-PRF-16173 anti-corrosion compound for superior corrosion resistance even in harsh environments.

McFarlane's quality is second to none in the aircraft industry. You don't have to pay more to get the best. McFarlane flight control cables and chains can reduce the cost of replacing all of the cables in one airplane by hundreds, even thousands of dollars, but you can still rest assured that you're installing the safest and highest quality parts available.

All FAA-PMA parts from McFarlane are fully traceable certified parts. Verification of authenticity or production history of any McFarlane replacement part may be verified free of charge at any time by simply supplying McFarlane with the lot number on the part label.

McFarlane Aviation Products has provided general aviation with high quality replacement aircraft parts at an affordable price for over 20 years. McFarlane Beechcraft flight control cables and chains continue this tradition by providing the best replacement parts at a money saving price.
