## **McFarlane Offers FAA-PMA Replacements for Stewart Warner Oil Coolers**

Baldwin City, Kansas, June 7, 2012 – McFarlane is now offering the HE (High Efficiency) Series oil coolers from Aero-Classics. The HE Series oil coolers are FAA-PMA direct replacement for the Stewart Warner oil coolers. The new oil coolers are an addition to Aero-Classic’s line of high quality FAA-PMA approved products, and will match or out-perform the Stewart Warner original.

Until now, approved replacements for the Stewart Warner oil coolers have only been available through the aircraft manufacturers, although the unapproved versions are available from many aviation sources. “The ability to offer our customers an approved alternative at pricing well below the OEM’s makes this an exciting new product line for McFarlane”, said Dan McFarlane. “We will stock most of the part numbers available, allowing for same day shipping to our customers.”

McFarlane Aviation Products has provided general aviation with high quality replacement parts at affordable prices for over 20 years. For more information, visit [www.mcfarlaneaviation.com](http://www.mcfarlaneaviation.com) or call 800-544-8594 or 785-594-2741.
