### General Installation Instructions for SA3-00-B Gascolator

---

1. Turn off fuel and remove cowling.
2. Disconnect fuel lines and remove original gascolator.
3. Remove fittings from original gascolator and install them in the SA3-00-B gascolator, paying attention to orientation. If a remote drain system is removed at this time, a drain valve (Curtis 1550 or Saf-Air Cav 110, etc.) needs to be installed in the bottom of the bowl. Use a gas resistant sealant on the threads.
4. Install the SA3-00-B gascolator to the mount bracket using new, or original AN hardware. Mount bracket may need contour filing to fit gascolator. Observe fuel flow direction.
5. Reinstall all fuel line connections, if remote drain system to be reused, reinstall and adjust. Secure the bowl with a cotter key, or .32 minimum safety wire, turn on fuel and check for leaks. Observe operation of remote drain and adjust if necessary.
6. Reinstall cowling.
7. Log installation in logs and 337.
8. Refer to Instructions for Continued Airworthiness for maintenance.
9. No basic weight change.
