Brake and Wheel Components

Brake Discs, Linings, Seals, and Assemblies

Optimal brake performance and safety!

APS BlackSteel Brake Discs, Brake Linings, Retaining Rivets and Pins

A truly superior product! Don't buy yesterday's technology!

- **BlackSteel Brake Discs** are one piece forgings, eliminating weld failures. *BlackSteel* forged discs are machined and then put through a proprietary heat treating process that strengthens the steel by bonding the carbon, oxygen, and nitrogen in the top layer of the metal.
- **APS semi-metallic brake linings** are impregnated with Kevlar fibers for optimum performance. **APS metallic brake linings** are constructed from an innovative design and durable materials, providing longer wear and superior stopping power for greater safety.
- **Lining retaining pins** are used on various metallic brake linings and rivets are used on various organic brake linings.

Brake Bleed Valves for Cleveland and McCauley Wheels

Improved - No more rust, no more rounded wrench flats

Bleeder Screws

- Strong heat treated 17-4 stainless steel prevents corrosion and rounding of the hex
- Increased hex size further resists rounding of the wrench hex

Bleeder Seats

- Stainless steel for corrosion resistance and strength

Even the Rubber Cap is Improved!

- Improved material prevents cracking
- Shorter design results in a more secure fit

Convenient Kits

- Two kits required per aircraft
- Components also available separately
